

05 Days District Level Training on Support Group Methodology and Misoprostol-Group 2

Event Venue: Training Hall, MCHIP Umerkot Office

Duration: 18-22 May 2015

Target Group: Health Care Providers (including Male and Female Medical Officers and Lady Health Supervisors)

Participants: 24

The 05 Days District level ToT on Support Group Methodology (SGM) and Misoprostol was conducted by MCHIP-Umerkot Team during 18 to 22 May 2015 at Training Hall, MCHIP Umerkot Office. 24 participants including Male and Female Medical Officers and Lady Health Supervisor from government, and Peoples Primary Health Initiative (PPHI) health facilities actively participated in the ToT.

The main objectives of the ToT were to;

- To train the facility based trainers on SGM & use of Misoprostol for further replication of same training to Lady Health Workers at facility level.
- To orient the participants about revised strategy and methodology of Support Group and its expected outputs
- To enhance the knowledge of Male and Female Medical Officers and Lady Health Supervisors on community level distribution and utilization of Misoprostol to minimize the deaths occurred due to Postpartum Hemorrhage (PPH).

The ToT was inaugurated by Dr. Jai Ram Das (Provincial Coordinator National Programme). He appreciated RSPN/Jhpiego for conducting such learning oriented training under MCHIP to enhance the skills and learning of the health care providers in the district. He also encouraged the Male and Female Medical Officers and Lady Health Supervisors for their active participation in the training. The training schedule included 2 days orientations and 3 days field to boost up the participants skills in the field practically.
