In support of the Accelerated Action Plan, Government of Sindh

PROGRAMME FOR IMPROVED NUTRITION IN SINDH

According to the World Bank, global prevalence of stunting improved at an average annual rate of 2.1%. However, Pakistan’s stunting rates have barely changed over the last three decades, worsening in recent years. According to Pakistan Demographic and Health Survey 2017-18, 38% of children under 5 in Pakistan are stunted. In Sindh alone, a whopping 50% of children are stunted.

To address this, the Government of Sindh (GoS) through the Planning and Development Department (PDD) is implementing a six-year, (from 2016 to 2021), multi-sectoral Accelerated Action Plan for Reduction of Stunting and Malnutrition in Sindh – Sehatmand Sindh.

The European Union, under the EU Commission Action Plan on Nutrition (2014), is supporting the Sindh Government through the comprehensive Programme for Improved Nutrition in Sindh (PINS). PINS aims to sustainably improve the nutritional status of children under five (U5) and of pregnant and lactating women (PLW) in Sindh through nutrition-specific and nutrition-sensitive interventions while capacitating the Government of Sindh so that it may efficiently implement its multi-sectoral nutrition policy.

Expected Impact of PINS

Reduce prevalence of stunting in children under 5 from 50% to 45%
Reduce prevalence of wasting in children under 5 from 18% to 13%
Reduce prevalence of anaemia in pregnant women from 60% to 50%

PINS comprises of three components – Technical Assistance, Nutrition-specific and Nutrition-sensitive. RSPN is leading the Nutrition-sensitive (PINS 3) component which focuses on reducing water-borne diseases and improving food diversity through disaster-resilient WASH infrastructures and sustainable food production systems in rural areas of Sindh. It is working with four partners: Action Against Hunger (ACF), National Rural Support Programme (NRSP), Sindh Rural Support Organisation (SRSO) and Thardeep Rural Development Programme (TRDP).

Expected Outcomes of PINS 3

Decrease in prevalence of diarrhoea in children under 5 from 28% to 18%
Increase in expenditure on a minimum of four food groups (outside staples) by target households by 20%*
Increase in consumption of 5+ food groups by women between 15 - 49 years from 27% to 40%
Increase in consumption of minimum acceptable diet by children under 2 from 13% to 30%

*above baseline

PINS 3 will pay specific attention to the following cross-cutting themes:

- Climate Change, Environment and Disaster Risk Reduction
- A Rights-Based Approach
- Gender Integration
PROGRAMME FOR IMPROVED NUTRITION IN SINDH

In support of the Accelerated Action Plan, Government of Sindh

29,359 HOUSEHOLDS (approx.)

Thatta

16 155 1,081

310 Agriculture Entrepreneurs have received training to manage Farmer Field Schools and conduct activities such as train community members on kitchen gardening

310 Community Resource Persons have collected household data and conducted Community-led Total Sanitation, developed Village Action Plans and conduct awareness sessions on WASH and better nutrition

PADDY FISHERY

155 Paddy Fish Farms Established

11 Alternate water sources developed

155 Village Action Plans established

16 UC-Level Demonstration Plots established

47 Handpumps constructed as part of 12 water supply schemes

669 Women provided with grants to purchase goats

5 Paddy Fish Farms Established

12,080 Latrines Constructed by the Community

15,879 Households Given Seeds to Cultivate Kitchen Gardens

17 Community Livestock Extension Workers have been trained on livestock management and provide services including vaccination, drenching and breeding to community members

85 WASH Entrepreneurs have been trained on sanitation concepts including its marketing, latrine construction and develop linkages with CRPs, masons and plumbers

850 Poultry Entrepreneurs have been trained on poultry management and received inputs to improve community access to poultry products

11 Masons and Plumbers have been trained on construction of low-cost disaster-resilient latrines and installation of hand pumps and will provide construction services in target areas

PINS is funded by the European Union
