LSO Initiatives

Local Support Organization Ittihad LSO

The leaders of LSO Ittihad are planning and implementing development activities both on a self-help basis as well as in collaboration with government agencies. The EU-funded BRACE Programme is empowering rural men and women in Balochistan by realising the power they gain from collective action. Organised men and women are now gaining awareness about their rights, making the service providers accountable, and also taking self-help initiatives to improve their lives.
Medical Camp in the Union Council

LSO Ittihad is a far-flung and poor area of the district, where people face many issues in Education and Health. Due to the unavailability of functional health facilities in UC, most of the community members go to the district headquarters hospitals for a check-up and better treatment. For the said purpose, LSO Ittihad has always been trying to facilitate their community at their doorsteps. The leaders of LSO arranged a free medical camp for the community members, where the team of doctors from the District Health Hospital and PPHI facilitated and treated all the patients for free.

Construction of link Road to the Union Council

Due to the improper and broken road of the UC, the LSO members conducted several meetings with the relevant organisation working on the road pavement in the area. The broken road remains closed and inaccessible during the rainy season most of the time due to rainwater. For this purpose, the LSO executive committee members collected amount from all the members and decided to renovate the link road on self-help basis. Finally, they constructed Kach road to the union council and now they have a proper road to the main road during heavy rains.

Registration of the CNICs

Most of the villagers in the Union Council have no access to the NADRA office due to which most of the CNICs are not registered or issued. The LSO executive body members played a vital role and supported the community in the process of CNIC registration through NADRA. They visited the office on regular basis to assist the applicant in the registration process.

Purchasing of catering items for Marriages and Programs

LSO Ittihad through self-help collected amounts and purchased catering items that are being used for the support of their own functions and other programs for zero cost and residents of the area are benefiting from this self-help initiative on regular basis.
Livestock Vaccination

Lahore is a rural union council of District Loralai and most of the community members are directly depending on the Livestock and agriculture. To ensure better livestock and maximum agri-production, the LSO have built strong linkages with livestock and agriculture department. They ask for regular visit to the agricultural sites and timely vaccination of the domestic animals to avoid any inconvenience. On regular basis the livestock and agriculture department officials visit their union council for the above-mentioned cause.
